

## ATTACHMENT A - EXECUTIVE SUMMARY

Enclosed please find Stericycle, Inc.'s Renewal Application for a Permit to Construct and Operate a Solid Waste Facility which consists of form DEP-SW-APP-106 as well as all applicable attachments, figures and tables. Stericycle Inc. currently operates a biomedical waste (BMW) transfer facility located at 85 Fieldstone Court in Cheshire, CT authorized under Connecticut Department of Energy and Environmental Protection (CTDEEP) Permit No. 02501314-PCO dated September 3, 2019. Stericycle Inc. is currently authorized to transfer up to 42 tons per day (tpd) of biomedical waste (BMW), and 4,000 pounds per day or 2 tons per day of non-hazardous pharmaceutical waste. The incoming and outgoing BMW have their own dedicated loading bays and all incoming waste will be scanned for radiation, although, radioactive materials will not be knowingly accepted for pickup/transfer by Stericycle. Upon arrival at the facility, the waste will be unloaded from the incoming route trucks and loaded into outgoing transfer trailers using hand carts. Incoming wastes will not be stored on site for longer than 7 days in accordance with the CTDEEP A.6 Approval for Permit to Construct and Operate No. 02501314-PCO and Text Correction Letter dated October 29, 2019.

If you require further information, have any questions, or if there is any reason why Stericycle's permit application cannot be approved, please contact Eugene G. Kempey P.E. at (607) 223-4653 or Eugene@kempey-engineering.com or Marvin Bowers at (443) 271-3928 or mbowers@stericycle.com. We look forward to the completion of the permit renewal process.
