

The requirement for workplace labeling under 29CFR 1910.1200 (f)(6) states: Except as provided in paragraphs (f)(7) and (f)(8) of this section, the employer shall ensure that each container of hazardous chemicals in the workplace is labeled, tagged or marked with either: the information specified under paragraphs (f)(1)(i) through (v) of this section for labels on shipped containers; or, product identifier and words, pictures, symbols, or combination thereof, which provide at least general information regarding the hazards of the chemicals, and which, in conjunction with the other information immediately available to employees under the hazard communication program, will provide employees with the specific information regarding the physical and health hazards of the hazardous chemical.

Using a permanent marker, write the name of the hazardous chemical, record the corresponding SDS# (if one is assigned by the employer), check the appropriate hazard, and, if appropriate, PPE; then affix the label to the container.
