

WORKPLACE SAFETY DURING THE PANDEMIC

Investing in safety is a priority for many businesses, but with the emergence of the coronavirus, many have made additional safety investments to protect their employees and customers. In its inaugural year, Stericycle's Workplace Safety Survey uncovers business leaders' and employees' perspectives on current safety measures and areas of concern.

28%
OF COMPANIES

spent up to \$50,000 on COVID-19 safety measures in 2020.

52%
OF BUSINESSES

experienced a decrease in profitability of more than 20%.

50%
OF COMPANIES

will dedicate 2-10% of their 2021 annual budget to COVID-19 safety.

79%
OF EMPLOYEES

would leave their job or look for a new one, if their employer did not offer workplace training around COVID-19 safety guidelines.

23%
OF EMPLOYEES

say their employer does not offer workplace training around COVID-19 safety guidelines.

33%
OF EMPLOYEES

think they and their coworkers need COVID-19 safety training.

54% AND 62%
OF EMPLOYEES OF LEADERS

believe used personal protective equipment (PPE) could pose an infection risk.

80%
OF EMPLOYEES

dispose of PPE at work.

Despite these concerns,
LESS THAN HALF
of companies will provide a designated PPE disposal area in the workplace.

Learn more about **Stericycle's 2020 Workplace Safety Survey**, or how Stericycle can support **PPE disposal in your workplace**. We protect what matters.
